

THE UNIVERSITY  
of ADELAIDE

# INGKARNI WARDLI TECHNOLOGIES PROGRAM

**Are you curious  
about how  
things work?  
Want to create  
solutions to the  
most challenging  
problems facing our  
communities?**

Applications are now open for Aboriginal and/or Torres Strait Islander students in Year 11 or 12 in South Australia who are interested in STEM to apply to attend the Ingkarni Wardli Technologies program at the University of Adelaide.

Held on our North Terrace campus in the heart of Adelaide, this immersive camp gives high school students the opportunity to experience the many different ways that engineering, computer science and maths can be applied to the real world.

Students will broaden their understanding of design, engineering, maths and technology by getting hands on through coding activities, testing robots, meeting industry representatives and so much more!

Applications close on Friday 11 June 2021 and places are strictly limited!

To apply for this once in a lifetime opportunity – [CLICK HERE](#)
